ID ASSIST® is a powerful card production software to instantly create professional and smart-looking photo ID cards using any Fargo card printer. With its intuitive interface yet powerful capabilities, you can easily design and produce fully-customized cards in just minutes!

Key Features:

Unlimited number of design possibilities. Design ID cards with ease. Add text, change color, incorporate objects, effects, logos, images, shapes, shadows, and more.

Improved security. To guard against unauthorized access, the application requires a username, a password, and a hardware key. It also supports role-based access control to assign specific roles to each user.

Encode and print in one pass. Improve your efficiency without compromising security. ID Assist can perform seamless printing and encoding of smart cards and magnetic cards in just one pass (Professional).

Real time network support. Aside from its internal database, ID Assist allows multiple users to share a common database over a network with MySQL Server 5.5 and Microsoft SQL Server 2008 all at the same time (Professional).

System Requirements:

At least Windows XP SP2
1GHz processor speed or higher
At least 1GB of RAM
Microsoft .NET Framework 3.5

Exclusively distributed by:
